

Reno Bit

100%
protection

ZERO
solvents

new generation bituminous coating
for renovation and maintenance of roof coverings

4 REASONS why NEXLER Reno Bit is the best choice

1

Rain-resistant after only 2 hours

NEXLER Reno Bit guarantees fast drying which makes it a perfect choice in unpredictable climate.

2

Durability and flexibility for years

NEXLER Reno Bit provides long-lasting roof protection against weather conditions and has high flexibility even in negative temperatures. This prevents cracks, extending the life of the roof covering.

3

Safe for health and for the environment

NEXLER Reno Bit does not contain any solvents nor toxic substances emitting harmful fumes and is virtually odorless, making it friendly to users and the environment. In addition, for its production we use energy-saving technology that minimizes the carbon footprint.

4

Simple application, quick results

Difficulties one can experience with using a torch (roofing felt welding) or even distribution of the product on a surface (solvent-based masses) are in the past from now. All you need for fast and effective application of NEXLER Reno Bit is a roller or brush. NEXLER Reno Bit consistency ensures ease of use and even coverage.

Technical data:

Consumption:	0,4 kg/layer	Application temperature:	from +5°C to +35°C
Rain resistance:	after 2 hours	Available packages:	10 kg and 20 kg
