NEW GENERATION SYSTEM

FOR RENOVATION AND MAINTENANCE OF ROOF COVERINGS
Fix Bit
roofing putty

100%
protection

ZERO
solvents

4 REASONS why to choose NEXLER Reno Bit & NEXLER Fix Bit

1 FAST RESISTANCE TO RAIN

NEXLER Reno Bit and NEXLER Fix Bit are guaranteed to dry quickly, so in our unpredictable climate they are the ideal choice, allowing to carry out work regardless of weather conditions.

2 DURABILITY AND FLEXIBILITY FOR YEARS

Provide long-lasting roof protection against weather conditions and has high flexibility even in negative temperatures. This prevents cracks, extending the life of the roof covering.

3 SIMPLE APPLICATION QUICK RESULTS

Difficulties one can experience with using a torch (welding of roofing felt) or even distribution of the product on a surface (solvent-based masses) are in the past from now. Thanks to the specially selected consistency, NEXLER Reno Bit can be applied with a roller or brush, while NEXLER Fix Bit can be conveniently applied with a brush or spatula, achieving a tight coating.

4 SAFE FOR HEALTH AND THE ENVIROMENT

Our innovative products are free of solvents and toxic substances that emit harmful fumes and are virtually odourless, making them user- and environment-friendly. In addition, their production is carried out using energy-saving technologies, minimizing the carbon footprint.

NEXLER Reno Bit COMPOUND FOR ROOF COVERING RENOVATION AND MAINTENANCE

extends the life of the roof

increased UV resistance

Consumption per m²

0,4 kg / layer

Rain resistance:

after 2 hours

Application temperature:

from +5°C to +35°C
