One-component polyurethane-bitumen resin

Using our innovative manufacturing technology, we have created a unique combination of polyurethane and bitumen:

POLYURETHANE ensures

- Permanent flexibility at low and high temperatures
- Resistance to UV radiation and aging process
- Rapid rain resistance

BITUMEN ensures

- Excellent adhesion to various substrates
- Resistance to mechanical damage
- Watertightness

NEXLER Connect

was designed to provide fast, secure, and durable connections between a variety of construction materials, such as:

- roofing felts
- bituminous coatings (including PMBC)
- metal sheets (including coated and acid-resistant)
- concrete
- rigid PVC
- EPDM membranes
- wood-based panels

Sealing of vertical-horizontal joints

Connecting different materials

Finishing parapet walls

Sealing of hard-to-reach places
