

Penetrator G7

fast drying primer

For under weldable and self-adhesive bituminous felts

SBS

modified with SBS

perfect penetration

mild odour

NEXLER Penetrator G7

works perfectly for:

- ▽ Priming concrete and sheet metal surfaces and old roof coverings for weldable and self-adhesive bituminous felts.
- ▽ Priming concrete slabs in bridge construction.
- ▽ Creating damp-proof insulations.
- ▽ Protecting wooden and metal elements embedded in the ground.

***Work in a system!
Extend the warranty
for your roof.***

Properties:

- ▽ Short drying time – **as little as 30 minutes.**
- ▽ High efficiency – **up to 100m² per pack.**
- ▽ Deep penetration and great adhesion to the substrate.
- ▽ Easy application with a brush, roller or spraying device.
- ▽ For dry and damp substrates.
- ▽ Protects concrete against moisture and corrosion.

**new
generation
of waterproofing**
